

Woods Valley Daily Conditions Report

Date / Time of report: **Wednesday, February 4, 2026 – 9:30am**
Current Temperature: 18 with cloudy skies
Current Wind: SSW – 5 to 8mph
Today's Forecast: Periods of flurries. High 22. WNW winds 5 to 10mph
Hours of Operation today: 4:00pm to 8:00pm

Mostly cloudy today with passing snow flurries. Temps will remain in the low 20's/high teens right through our 8pm closing. Total snowfall over the past 24 hours has been 2 inches – bringing our season total to 174 inches! Snow conditions are excellent. **PLEASE STAY OUT OF THE NEWLY CLEARED AREAS WHERE OUR T-BAR LIFT WAS LOCATED.** Snow Tubing will reopen for the weekend on Saturday. See details by trail below.

Trails Open	20 of 21 trails through dusk. 11 of 11-night trails. May be some areas of thin cover on Natural Snow trails.	
Lifts Open	4 of 4	
Base Depth	16 to 32 inches. There may be thin cover in our steeper glade areas. Always ski with a buddy in all-natural areas.	
New Snow	2 inches past 24 hours. 6 inches over past 7 days. Year-to-date total = 174 inches.	
Surface Condition	Machine Groomed Packed Powder / Powder	
Surface Notes	Exercise caution off the groomed surface. Never interfere with snow making operations.	

Lift	Status	Hours of Operation
I – Big Chair – Double Chair	Open	4pm to 8pm
II – Small Chair – Double Chair	Open	4pm to 8pm
III – Learning Zone Carpet 1	Open	4pm to 8pm
IV – Learning Zone Carpet 2	Open	As Needed 4pm to 8pm

What's Happening at Woods Valley.

Slope conditions will be Machine Groomed / Packed Powder / Powder this afternoon and evening. There are trails left ungroomed – see below. Temps will remain in the upper teens with light winds. Snowmaking hours total over 120 hours so far this season and we have received over 14 feet of snow since late November. Ski and ride with caution. **DO NOT SKI AREAS MARKED AS CLOSED.** Have fun and be safe.

Live music this evening with Pocket Change - 6 to 9pm. Visit the Music in the Hemlock Room page for a complete list of live music. The lodge is always open and offers food and beverage service, a beautiful fireplace, seating, sweeping views of the slopes, equipment rentals and lessons.

We are also open in the business office and retail shop. If you have purchased your season pass you may come in to have your pictures taken so we can print your pass. We are also selling gift cards and retail items. **2026/27 season passes go on sale Friday, March 6 – for current passholder.**

ALWAYS Ski and ride in control and with caution. **Know the Code.** Stay up to date by visiting our website www.woodsvaleyskiarea.com

Difficulty	Trail Name	Projected Status	Snowmaking	Groomed	Night Trail?
● ○ Easiest	Easy Acres	Open	No	Yes	Yes
● Easiest	Learning Zone	Open	No	Yes	Yes
● Easiest	Broadway	Open	No	Yes	Yes
● Easiest	Fly Away	Open – through dusk	No	Yes	No – closes at dusk
● Easiest	Round About	Open	No	Yes	Yes
● Easiest	Side Winder	Open – through dusk	No	Yes	No – closes at dusk
■ ○ More Difficult	Copycat/Lower Park	Open	No	Yes	Yes
■ More Difficult	Bowl	Open	No	No	Yes
■ ○ More Difficult	Upper Timmy's	Open	No	Yes	Yes
■ More Difficult	Short Cut	Open	No	No	Yes
◆ Most Difficult	Peppers Pride	Open	No	Yes	Yes
◆ Most Difficult	Sting	Open – through dusk	No	No	No – closes at dusk
◆ Most Difficult	Timmy's Run	Open	No	Yes	Yes
◆ ○ Most Difficult	Snow Park	Open	No	Yes	Yes
◆ Most Difficult	Deer Glade (all-natural skiing)	Open – through dusk	No	No – Natural Terrain	No – closes at dusk
◆ Most Difficult	Freya's Woods (all-natural skiing)	Open – through dusk	No	No – Natural Terrain	No – closes at dusk
◆ Most Difficult	Woody's Way (all-natural skiing)	Open – through dusk	No	No	No – closes at dusk
◆◆ Most Difficult Use extra caution	Rabbit Hole (all-natural skiing)	Open – through dusk	No	No – Natural Terrain	No – closes at dusk
◆◆ Most Difficult Use extra caution	Valkyries (all-natural skiing)	Open – through dusk	No	No – Natural Terrain	No – closes at dusk
◆◆ Most Difficult Use extra caution	Valhalla (all-natural skiing)	Open – through dusk	No	No – Natural Terrain	No – closes at dusk
◆◆ Most Difficult Use extra caution	Hemlocks (all-natural skiing)	Closed for season due to excessive tree damage	No	No – Natural Terrain	No

Note: ○ Indicates freestyle terrain.

Note about All-Natural Skiing areas (Gladed Trails): Please honor all ropes and signs. Use extra caution. Surface is not maintained. Many obstacles exist. Please ski with a friend.

NOTICE: The lift operating schedule, status of open/close trails, and snow conditions are subject to change throughout the day as a result of weather, skier/snowboarder traffic, and other influences beyond our control. Be aware of changing weather conditions. Natural and manmade obstacles exist. Snowmaking and Grooming activities are routinely in progress on trails designated as open. SKI AND RIDE WITH CARE. This report reflects the daily operational plan. Changes to this plan may occur from weather, snow conditions or other factors during the day or night.

Snow Conditions Codes and Definitions: The following surface condition codes and definitions explain the type of snow surface reported at Woods Valley. Woods Valley endeavors to inspect trails and report conditions consistent with terminology descriptive of surface condition(s) developed by the New York Ski Industry Association, Ski Areas of New York, Inc. These are approved by Article 18, the New York Safety In Skiing law.

MG = MACHINE GROOMED.

BS = BARE SPOTS - Areas of exposed underlying trail surface NOT covered with sufficient amounts of any form of snow, ice or other skiable material. No skier should attempt to ski over or through any Bare Spot or Spots.

CO = CORN SNOW - Large ice-like granules, which are loose during above-freezing temperatures and which freeze together during below-freezing temperatures. Corn snow is usually a product of the above/below freezing cycle of temperatures typical of spring days. Large ice-like granules which remain frozen together in extended cold periods, or chunks of ice created by incomplete grooming or icy surfaces are not characteristic of corn snow.

FG = FROZEN GRANULAR - Granular snow which was once wet and which has frozen together forming a rather solid or crusty-textured surface. It can return to loose granular after thawing or being worked by a grooming machine or from the effects of skier traffic breaking up the crust. Frozen granular snow will support a ski pole stuck into it. However, if the pole makes ice chips and the surface will not support the pole, the surface is ICY. HP = HARD PACK - Hard pack snow is a dense, compressed snow condition harder than packed powder and softer than ice.

IP, IS = ICE PATCHES, ICY SURFACE - Ice represents a hard, glazed surface usually created by freezing rain, or old surface snow melting and quickly refreezing again, or by ground water seeping up into the snow and freezing. Also may describe a very wet surface that has been skied into a smooth surface while above-freezing temperatures are existent and then rapidly dropping temperatures occur. When broken, ice breaks into chunks rather than granules. Patches describe localized occurrences of ice; surface describes a more prevailing icy condition on the slope.

LG = LOOSE GRANULAR - Loose granules similar to rock salt, usually formed after powder snow thaws, refreezes and crystallizes or an accumulation of sleet. Loose granular may also characterize surface conditions produced by machine conditioning of frozen granular or icy surfaces.

P = POWDER - New snow generally of dry and fluffy consistency. Will not make a snowball easily.

PP = PACKED POWDER - Loose powder snow compacted by rollers, drags or other mechanical apparatus or by skier traffic to a state which leaves little air space between particles. It is no longer fluffy, but it is not so extremely compacted that it is hard and icy.

SC = SPRING CONDITIONS - This term is used to characterize the wide variety of surface conditions which results from the alternate freezing and thawing of snow cover in spring weather. This term is used in place of other terms when the usual surface descriptions cannot accurately or completely describe the situation, that is, when no single surface type covers at least 50% of the skiable surface of a trail.

TC = THIN COVER - Indicates that the cover that currently exists will decline in quality due to skier traffic and may break through to the underlying trail surface. Thin Cover indicates that Bare Spots are anticipated to develop in the area during the day.

V = VARIABLE - A wide variety of conditions which cannot accurately or completely be described using usual terminology, such as when no single surface type predominates.

WG = WET GRANULAR - loose or frozen granular snow which has become wet and soft after a thaw or from a rainfall.

WP = WET POWDER - Powder snow that is wet when it falls (you can easily make a snowball) or dry powder that becomes wet as the temperature rises above freezing or is dampened by rain.
